The Power to Earn

is the distinctive feature of the **Holyoke** and the point of vital difference between it and the slow old-style machines.

**ITS RATE OF SPEED,
THIRTY CUTS A MINUTE,**

Means { One second to clamp and cut six inches of paper.
 { One second to unclamp and return to position.

The quick **rotary** movement of the simple, massive working parts is largely responsible for this, just as the raw-hide Driving Pinion for the absolute silence.

Its clamp is no respecter of paper: tissue or tar-board fare alike. Once under there is no slip.

Its Users Say that it is revolutionizing the quick, accurate cutting of tough materials in large quantities and earning profits lost before. May we send you details?

PREFACE.

WE PRESENT herewith the TWENTY-SECOND Annual Edition of LOCKWOOD'S DIRECTORY of the Paper, Stationery and Allied Trades for 1896-7, and offer our usual summary of changes in firms and among the mills in the United States and Canada during the year.

Following is a comparative statement of this year with last preceding report of mills in the United States :

	<i>1895.</i>	<i>1896.</i>
Number of Mills,	1,202	1,190
" " in operation,	1,101	1,065
" " idle,	101	125

The mills reported, as above, are owned or operated by eight hundred and seventy-four firms or establishments, this being an increase of forty-one in the number of firms. There are one hundred and twenty-five mills reported as being idle—an increase of twenty-four over last year. Eighteen mills have been abandoned. Seven were destroyed by fire. Our reports show that the number of mills in operation is less by twelve than at the same time last year. There are now six mills under construction.

There are seventy-nine mills in the Dominion of Canada, owned or operated by forty-eight firms or establishments. Four of these mills are idle. One mill is now in course of construction. One mill has been abandoned since last year.

We also give a list of mills in the United States of Mexico, and of mills in South America.

Following our custom we have made a separate record of mills which have been reported to be idle. Under this head will be found locations of mill properties which may still be made available for paper making, or which can be utilized for other purposes. This separation also tends to make the list of mills actually in operation all the more valuable.

We continue to make a separate list of Pulp and Chemical Fibre Mills.

The Index to Mills will be found very complete, and should always be consulted when looking for individual firms.

In this edition will be found a list of Paper Dealers and Stationers, wholesale and retail ; Manufacturers of Glazed, Coated, Waxed and Parchment Papers and Cardboard ; Leading Printers, Lithographers, Book Publishers, Bookbinders, Blank Book, Paper Bag, Paper Box, Envelope, Pad

and Tablet Manufacturers; Wall Paper Printers and Railroad Purchasing Agents in the United States.

The business announcements have been classified carefully, and this list constitutes the BUYERS' GUIDE TO FIRST HANDS, and will be found of great use in placing orders. An Alphabetical Index to Advertisements appears as usual.

For all additional statements of changes in the trade, current news, technical articles and market reports, we refer our subscribers to the columns of THE PAPER TRADE JOURNAL (every Saturday) and THE AMERICAN STATIONER (every Thursday).

Advices as to changes, removals and business orders for insertion in the next edition should be sent in on or before April 1, 1897.

H. L. & CO.

LIST OF ABBREVIATIONS USED IN THIS DIRECTORY.

S. P.—*Shipping Point.*

Tel.—*Telegraph.*

Pop.—*Population.*

Ex.—*Express.*

M. O.—*Money Order.*

RR.—*Railroad.*

SPECIAL NOTICE. . . .

HOFMANN'S TREATISE
... ON ...
PAPER-MAKING.

IN 1873—twenty-three years ago—CARL HOFMANN first published his **TREATISE ON PAPER-MAKING**. He was then, and for some years had been, a practical paper-maker in America. His experience in the trade abroad, as well as in this country, and his technical education and knowledge enabled him to be specially adapted for the work; hence "Hofmann's Treatise on Paper-Making" took high rank at the start, and soon became a standard work on the subject throughout the world. It was published in English, German and French, and had wide sale in all three languages.

As years passed it became *the* standard work, and for the past decade copies have sold at large prices, often as high as \$30 each, and occasionally for more money. The original book consisted of 422 pages, $8\frac{3}{4} \times 11$ inches in size.

Mr. Hofmann returned to Germany more than twenty years ago and settled in Berlin. He established the *Papier-Zeitung*, and in due course, about nine years ago, began to write his second and latest Treatise. Thus far he has printed and published probably 1,400 pages in German, and in parts of 48 pages, including cover, profusely illustrated by wood cuts. When finished the book will consist of about 1,600 pages (pages size same as in first book), illustrated by 1,500 wood cuts.

We are translating and publishing the work in English in twenty parts, of about eighty pages each, at intervals of not less than sixty days, and at a cost of **one dollar cash, in advance, for each and every part**. When the enterprise is completed the twenty parts will sell, **unbound, for twenty dollars**. The binding will be extra. Subscribers can themselves have parts bound, or have us bind them at extra expense; but it should be noted that no money will be saved by waiting until THE TREATISE is completed and bound. The first five parts are on the market.

Orders can be placed now, or later if preferred; and subscribers can send **one dollar or six dollars**, which latter would pay for six parts during a year.

We cannot accept any order that is not accompanied by the cash.

Every manufacturer of paper or pulp, every superintendent of a mill, every machine tender, every man whose life work consists in making or selling paper in the United States, Canada and all over the world, except Great Britain and the Continent of Europe, should send us his subscription. We will furnish each part postpaid. We print and ship the English Edition for the European market, but cannot accept orders therefrom.

JAMES LEFFEL & CO.,
SPRINGFIELD, OHIO, U. S. A.

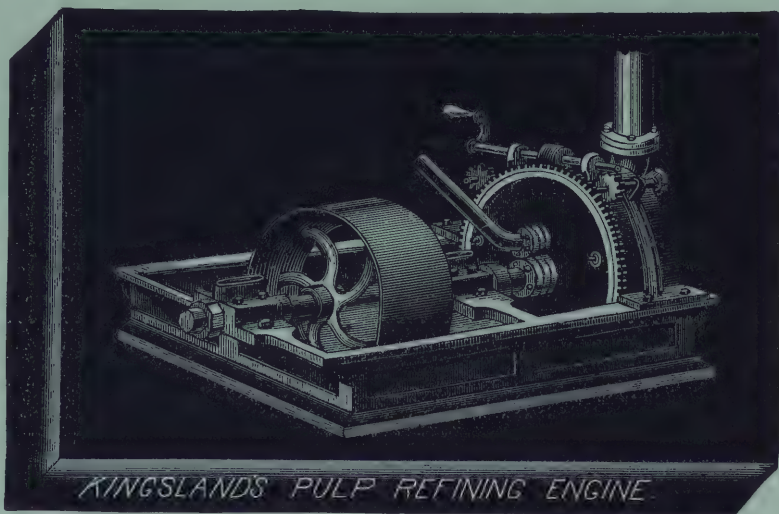

ESTABLISHED 1842.

CYRUS CURRIER & SONS, NEWARK, N. J.,

MANUFACTURERS OF ALL KINDS OF

Paper Making Machinery.

SOLE MANUFACTURERS OF

KINGSLAND'S PULP REFINING ENGINE

THIS is the best Refining Engine on the market for any kind of stock. It occupies but a small space—4 feet wide by 5 feet 9 inches long—and it is not necessary to have a spare engine, as the worn-out plates can be taken out and a new set put in in a few hours' time; and there is no loss of time for grinding the knives down, as they are ground to a perfect bearing before leaving our shop.

We are making a large engine of about three times the capacity of the small one—and they are giving best possible satisfaction. Special attention paid to the Regrinding of Rolls.

[SEE OTHER SIDE].

No "Wet Broke."

We are making an ATTACHMENT
for the FOURDRINIER MACHINE

which, for the running of light papers
or papers made from weak stock (liable
to break between the wire and press
rolls,) IS A PRONOUNCED SUCCESS.

[SEE OTHER SIDE].

KELLY'S MACHINE For Washing and Beating Paper Stock.

MANUFACTURED BY THE

O. S. KELLY COMPANY,
SPRINGFIELD, OHIO.

RAGS and similar stock are washed perfectly clean and reduced to half-stock in one minute's time. In making straw board, straw wrapping, carpet lining and similar products, the beating as well as the washing is completed in one minute's time. The operation is a continuous one. The stock is fed into one end of the machine and discharged from the other. Capacity of machine, one ton per hour, with less than one-third the power consumed by the ordinary method.

*The Largest Manufacturers of Chilled
Rolls in the World.*

We call attention to our improved Box Housings (shown above), insuring greater strength and rigidity than can be obtained in web patterns. This is especially desirable in the high-speed 12-and 14-roll stacks now in use on news machines.

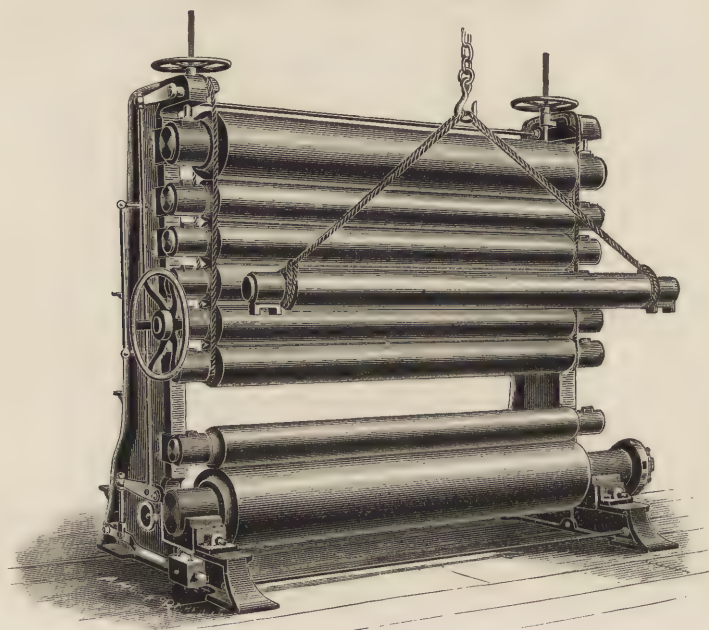

FRANKLIN FARREL, PRESIDENT.

FRANK E. HOADLEY, SECRETARY.

AND MACHINE CO.

CONN., U. S. A.,

IMPROVED OPEN FACE HOUSINGS (Patent applied for), SO ARRANGED
THAT ANY ROLL CAN BE REMOVED WITHOUT
DISTURBING OTHERS IN THE STACK.

NOTICE:

FIRST—Strength and Simplicity of housings.

SECOND—Lift rods of flexible wire rope or chain (Patent applied for), fastened at one end to screws and at the other end clamped to back side of frame; operated by hand wheels above, so that the rolls may be raised or lowered. When not in use ropes may be detached from housings if desired.

THIRD—System of triple compound levers.

FOURTH—Adjustment of bottom roll by set screws.

THE EMPIRE Type-Setting Machine FOR BOOK PRINTERS.

The Empire sets *two sizes of type in each machine*. The speed is only limited by the operator, and the operator can work faster than on any other machine. Book printers must have good type and cannot use inferior metal; therefore they should buy a machine which sets type instead of casting it.

AUTOMATIC DISTRIBUTER.

Many operators set 6,000 to 8,000 ems per hour.

Very little time is required to change from one size of type to another.

Send for list of the printers who are using these machines in
New York and other large cities.

SEE OPPOSITE PAGE.

THE EMPIRE Type-Setting Machine FOR BOOK PRINTERS.

The Empire sets ordinary type. Requires no machinist, metal or gas. Simple in construction and moderate in price. Rapid and accurate in operation. Admits use of italics, small caps and black letter side-heads.

COMPOSING MACHINE.

4,500 ems per hour guaranteed or no sale.

More than 150 machines now in operation.

Write for price and further particulars.

THE
Paper Trade Journal,

DEVOTED EXCLUSIVELY TO THE INTERESTS OF
THE AMERICAN PAPER TRADE.

Weekly, \$4.00 Per Annum.

Single Copies, 10 Cents.

THE JOURNAL contains the latest and fullest information relative to the paper trade in all parts of the world, including descriptions of new appliances and processes for making paper, experiments with new fibres and other materials, a record of the water supply, with the latest manufacturing news in all parts of the country. It gives the cream of all the foreign technical journals which relate to the paper interest, besides communications from competent persons in the trade, both at home and abroad. The market review and quotations show the state of trade in all the principal cities, and no pains have been spared to make these accurate and complete.

Payment for subscriptions or advertising may be made by express money order, draft, post office order or registered letter.

ALSO SOLE AGENTS AND MANUFACTURERS OF

Curtis & Jones Artificial Stone Sulphite Digester Lining.

Curtis & Jones Blow-off Pipes. Jones & Craft Blow Pits.

Curtis & Jones Improved Acid Plant.

220 DEVONSHIRE ST., BOSTON, MASS.

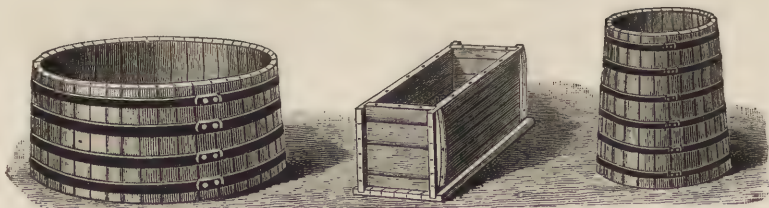

The Curtis & Jones Digester Linings have proved beyond a question to be what you might call the only practical lining ever used in the manufacture of Sulphite Fibre. It is positively acid proof. It is durable and improves by use. It will not radiate, thereby saving 25 per cent. in fuel. It insures an even cooking of the entire contents. It will not chip or crack. It does not require the application of tiles. It will produce more No. 1 fibre in a given time than any other known digester, and as far as we can judge there is no reason why it will not last for years.

In a number of mills that we have planned, constructed and equipped throughout every mill has been able to produce its full capacity within 30 days from the time the machinery was started, and without making any changes—an unprecedented record.

CYPRESS TANKS AND VATS

OF EVERY DESCRIPTION.

Cypress is remarkable for its great durability. There is no other wood so well adapted for the manufacture of Tanks, Vats, Cisterns, Dye Tubs, &c. We handle Cypress from the Stump, and our stock is of the best.

WE PUBLISH A DECIMAL TABLE OF COMPARATIVE SIZES AND WEIGHTS OF PAPER.

The largest table of its kind ever published. Sixteen thousand combinations
of sizes and weights. • Weights carried to tenths of pounds.

Absolutely correct and reliable. Gives
comparative Ream Prices.

Manufacturers, Dealers, Printers and Publishers who are continually figuring
the comparative weights of paper will find this table invaluable.

It is printed on a buff tough check and No. 21 glazed bond, either of which we
mail postpaid for One Dollar.

CABLE ADDRESS: CATCHOW, NEW YORK.

The American Bookmaker,

A JOURNAL OF TECHNICAL ART AND INFORMATION
FOR PUBLISHERS, BOOKBINDERS, PRINTERS, BLANK
BOOK MANUFACTURERS AND ALL OTHERS CON-
NECTED WITH OR INTERESTED IN BOOKMAKING.

*Exteriors and Interiors, Book Talk and Tattle, Graver and Matrix, Book Sheets and Covers;
From Case to Press, Communications, Plates and Processes, Mechanical Appliances,
Correspondence, Bookmaking Industries, Gatherings.*

THIS Journal is intended to occupy the middle ground heretofore unappropriated and scarcely touched by publications which represent cognate industries and yet do not attempt to supply all of the requisites as to technical information in bookmaking, for which there is and must be a demand. The intermediate stages of book construction, from the raw material to the finished product of the printer's and binder's art, will be presented in such a form as to interest all who may care to read or learn. Suggestion and opinion, originality and invention, instruction and investigation will find room in the columns of THE BOOKMAKER, and the concurrence of all who wish to attain success in bookmaking is sought to enable this journal to make itself useful to the greatest number of those to whom it can give aid and information.

Subscription, \$2 per Annum. Single Copies, 25 Cents.

FOREIGN SUBSCRIPTIONS, POSTAGE ADDED.

Payment for Subscriptions or Advertising may be made by express money order, draft, post office order or registered letter.

The Publishers of this paper ask for the co-operation of its readers in the way of information, communications which can be utilized, suggestions, news items, &c.

Contributions of a technical nature suited to the purposes of this paper will be liberally paid for if accepted.

Copy for advertisements should be sent in by the 20th day of the month next preceding the date of issue.

All communications must be addressed to

HOWARD LOCKWOOD & CO., PUBLISHERS.
